

## Environmental Policy

Ultra Ice (UK) Ltd takes a close and responsible interest in and respect for the physical, economic and social impact of all the activities in which it is involved.

With use of best practise methods and innovation, it aims to minimise any negative actions and help contribute to environmental improvement and sustainable development.

Environmental impacts are constantly assessed within every stage of the business and individual project, and improvements made within a systematic process.

Ultra Ice (UK) Ltd will fully satisfy the following requirements:

- Comply with all legal requirements as a minimum standard
- Consider environmental impacts and implement improved options at all stages of the operation
- Prevent pollution and protect the natural environment
- Reduce the effects of noise, dust, disturbance and inconvenience arising from its activities
- Use raw materials and resources efficiently, through correct use, storage, handling and preservation
- Encourage the recycling of all the waste it produces
- Respond promptly to any complaints promptly arising from its actions
- Nominate a senior manager with specific responsibility for environmental issues
- Actively involve employees and ensure appropriate training is given to raise awareness and appreciation of environmental issues

This policy will be brought to the attention of all employees, made available to the public and reviewed on an annual basis
